Section No. 1 – General Index (A to Z)	
Section No. 2 – Index of Liquids (A to Z)	
Pump Selection Guide	11

CONTENTS OF SECTION 1

Hydraulics

	Page
Introduction	1-3
Liquids	1-3
Liquid Flow	1-4
Viscosity	1-5
Pumping	1-6
Volume–System Head Calculations–Suction Head	1-6, 1-7
Suction Lift–Total Discharge Head–Velocity Head	1-7, 1-8
Total Sys. Head–Pump Head–Pressure–Spec. Gravity	1-9, 1-10
Net Positive Suction Head	1-11
NPSH–Suction Head-Lift; Examples:	1-11, to 1-16
NPSH–Hydro-Carbon Corrections	1-16
NPSH–Reciprocating Pumps	1-17
Acceleration Head–Reciprocating Pumps	1-18
Entrance Losses–Specific Speed	1-19
Specific Speed–Impeller	1-19
Specific Speed–Suction	1-20, 1-21
Submergence	1-21, 1-22
Intake Design–Vertical Wet Pit Pumps	1-22 to 1-27
Work Performed in Pumping	1-27
Temperature Rise	1-28
Characteristics Curves	1-29
Affinity Laws–Stepping Curves	1-30
System Curves	1-31
Parallel and Series Operation	1-32, 1-33
Water Hammer	1-34
Reciprocating Pumps–Performance	1-35
Recip. Pumps–Pulsation Analysis & System Piping	1-36 to 1-45
Pump Drivers–Speed Torque Curves	1-45, 1-46
Engine Drivers–Impeller Profiles	1-47
Hydraulic Institute Charts	1-48 to 1-52
Bibliography	1-53

CONTENTS OF SECTION 2

Selected Formulas and Equivalents

	Page
General Information on Liquids	2-3
Volume and Weight Equivalents	2-4
Head and Pressure Equivalents	2-5
Flow Equivalents	2-6 and 2-7
Flow Through Orifices and Nozzles	2-8
Flow Data – Nozzles	2-9
Flow Data – Weirs	2-10 and 2-11
Irrigation Table	2-12
Frequently Used Formulas, Constants and Conversions	2-12 to 2-16

(For metric formulas see page 8-28)

CONTENTS OF SECTION 3

Friction Data

	Page
Friction Loss Principles	3-3
Darcy-Weisbach Formula	3-3
Hazen and Williams Formula	3-7
Example – Head Loss Calculation	3-9 to 3-10
Moody Diagram – Reynolds Nos. Versus Friction Factor Chart	3-11
Friction of Water in Cast Iron and Steel Pipe	3-12 to 3-34
Friction of Water in Copper Tubing and Brass Pipe	3-34 to 3-48
Friction of Viscous Liquids in Pipes	3-48 to 3-88
Friction of Paper Stock in Pipes	3-88 to 3-101
Friction of Paper Stock in Fittings	3-101 to 3-102
*General Information – Pulp and Paper Industry	3-103 to 3-110
Friction of Water – Valves and Fittings	3-110 to 3-122
Friction of Water – Valves and Fittings in Terms Equivalent Length Straight Pipe	3-120 to 3-121
Friction – Viscous Liquids – Valves and Fittings	3-122

* NOTE: Pages 3-103 through 3-109 are located in this section (following Paper Stock Friction Data) for convenience and ready reference.

CONTENTS OF SECTION 4

Properties of Liquids

	Page
Density Information	4-3
Properties of Water	4-4
Density – Specific Gravity Data	
API Scales	4-6
Properties of Sodium and Calcium Chloride	4-10
Properties of Caustic Soda	4-11
Baume Scales	4-12
Densities of Sugar Solutions	4-13
Specific Gravity of Petroleum vs. Temperature	4-14
Specific Gravity of Hydrocarbons	4-15
Specific Gravity of Miscellaneous Liquids	4-16
Specific Gravities of Aqueous Solutions	4-17
Specific Gravities of Refrigerant Liquids	4-18
Vapor Pressure Information	
Vapor Pressure of Gasolines	4-19
Vapor Pressure of Hydrocarbons	4-20
Vapor Pressure of Various Liquids	4-21
Vapor Pressure of Refrigerant Liquids	4-22
Viscosity Information	
Viscosity Conversions	4-25 to 4-28
Viscosity of Crankcase Oils	4-28
Viscosity of Turbine Oils	4-29
Viscosity of Fuel Oils	4-30
Viscosity of Petroleum Oils vs. Temperature	4-31
Viscosity of Miscellaneous Liquids	4-32
Viscosity of Refrigerant Liquids	4-33
Viscosity of Sucrose Solutions	4-34
Viscosity Blending Chart	4-35
Petroleum Temperature Volume Relations	4-36
Viscosities and Specific Gravities of Misc. Liquids	4-37 to 4-45
Pump Performance with Viscous Liquids	4-45
Pump Performance Corrections Charts	4-47 and 4-48
Pump Performance on Paper Stock	4-49
Slurry Information	4-50 to 4-56

CONTENTS OF SECTION 5

Steam Data

	Page
Notes on Steam	5-3
Enthalpy and Entropy – Definition	5-4
Mollier Diagram	5-5
Pressure – Enthalpy Chart	5-6
Steam Tables:	
Temperature Data (to 705.47°F)	5-7
Pressure Data (in Hg Abs)	5-14
Pressure Data (mm Hg Abs)	5-17
Pressure Data (to 3208.2 psia)	5-19
Superheated Steam Data	5-21
Theoretical Steam Rates for Steam Turbines	5-25
Approximate Turbine Efficiencies	5-30
Vapor Flow Formulas	5-32
Pressure Drop in Steam Piping	5-34
Low Pressure Steam Flow	5-38
Pressure Drop in Steam Fittings	5-39
Psychometric Chart	5-40
Boiler Feed Flow Data	5-42

CONTENTS OF SECTION 6

Electrical Data

	Page
Summary of Electrical Formulas	6-3
Motor Selections	6-4
Motor Efficiencies	6-5
Motor Characteristic	6-6
Full Load Currents of Motors	6-8
Motor Wiring	6-9
Motor Branch Circuit Protection	6-11
Properties of Conductors	6-12
Carrying Capacity of Insulated Wire	6-14
Effect of Voltage and Frequency Variation	6-15
Allowable Voltage and Frequency Variations	6-16
Full Load Speeds of Synchronous Motors	6-17
NEMA Motor Frame Dimensions (T/TS)	6-18 and 6-19
Bedplate Pad and Motor Dimensions for NEMA Motor Frames	6-20 to 6-23
H.I. – NEMA Type C Face-Mounted Motors Standard Dimensions	6-24
Dimensions (Type C, JM and JP Motor Shafts)	6-25
H.I. – NEMA Type HP and HPH Vertical Solid Shaft Motor Standard Dimension	6-26
Dimensions (HP-HPH)	6-27
Standard Dimensions for NEMA Vertical Inline Motor Shaft Extensions (P-Base Construction)	6-28

CONTENTS OF SECTION 7

Cast Iron and
Steel Pipe Flanges
and Flange Fittings

	Page
Weights of Flanged Cast-Iron Pipe	7-3
Weights of Flanged Cast-Iron Fittings	7-4
Dimensions of Cast-Iron Flanges	7-5
Pressure-Temperature Ratings	7-6
Dimensions of Cast-Iron Flanged Fittings	7-7
Dimensions and Weights of Steel Pipe	7-8 to 7-12
Dimensions of Steel Pipe Flanges	7-13 to 7-15
Flange Ratings – 150 lb.	7-16
Flange Ratings – 300 lb.	7-17
Flange Ratings – 400 lb.	7-18
Flange Ratings – 600 lb.	7-19
Flange Ratings – 900 lb.	7-20
Flange Ratings – 1500 lb.	7-21
Flange Ratings – 2500 lb.	7-22

CONTENTS OF SECTION 8

Miscellaneous Data

	Page
Decimal and Millimeter Equivalents	8-3
Arithmetical and Geometrical Formulas	8-3
Approximate Altitude and Barometer Reading	8-4
Barometer Reading Corrections	8-5 to 8-9
Weight and Dimensions of Copper Tubing and Pipe	8-10
Volume in Partially Filled Horizontal Tanks	8-11
Capacities of Cylinders and Tanks	8-12
Displacement Per Stroke of Plungers	8-13
Areas of Circles	8-14
Hardness Conversion Table	8-15
Use of Gages and U Tubes	8-16 to 8-20
Pump Data Sheet for Material Selection	8-21
Pump Materials	8-22 to 8-28

CONTENTS OF SECTION 9

Conversion Factors

	Page
General Notes	9-3
Common English Equivalents and Formulas	9-4
Notes on International System (SI) of Units	9-5
Metric (SI) Conversion Data	9-8
Fahrenheit and Celsius Equivalents (Conversion Table)	9-11
Metric (SI) – Conversion Factors	9-14 to 9-27
Metric Flow Formulas	9-28
